

University of Texas / Texas Politics Project Poll
Texas Statewide Survey

Field Dates: October 10-20, 2025

N=1200 Registered Voters

Margin of error: +/- 2.83% (3.32% adjusted for weighting) unless otherwise noted¹

Interest and Engagement

Q1. Are you registered to vote in the state of Texas?

Q1	Percent
Yes, registered	100

Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?

Q2	Percent
Extremely interested	40
Somewhat interested	41
Not very interested	12
Not at all interested	5
Don't know	1

Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?

Q3	Percent
Every election	35
Almost every election	35
About half	11
One or two	11
None	6
Don't know	2

¹In calculating the margin of error (MOE) for the survey, we provide two calculations, one that compensates for the relative standard deviation of the weights and one that does not. Without taking the variance of the weights into account, the margin of error for the full sample is 2.83%. To compensate for the additional uncertainty from weighting, we apply a multiplier derived from the coefficient of variation of the weights: $\sqrt{1+CV^2}$, where $CV=sd(weights)/mean(weights)$. For this weight sensitive calculation, the MOE for the full sample is 3.32%.

Most Important Problem

Q4. What would you say is the most important problem facing this country today? **[Randomize]**

Q4	Percent
Political corruption/leadership	22
Inflation/rising prices	14
The economy	11
Immigration	8
Health care	5
Moral decline	4
Federal spending/national debt	4
Crime	4
Gun control/gun violence	3
National security/terrorism	3
Border security	2
Income inequality	2
Environment/climate change	2
Unemployment/jobs	2
The media	2
Voting rights	1
China	1
Education	1
Homelessness	1
Foreign trade/tariffs	1
Partisan gridlock	1
Housing	1
Abortion	1
Race relations	1
Social welfare programs	1
Taxes	1
Middle East instability	0
Artificial Intelligence/AI	0
Opioid/drug abuse	0
Police misconduct	0
Gas prices	0
Redistricting	0
Russia	0
Sexual harassment	0
Energy	0
Electoral fraud	0

Q5. What would you say is the most important problem facing the State of Texas today?
[Randomize]

Q5	Percent
Political corruption/leadership	18
Inflation/rising prices	14
Immigration	9
Border security	7
The economy	6
Taxes	5
Redistricting	4
Education	3
Crime	3
Health care	3
Gun control/gun violence	3
Unemployment/jobs	3
Homelessness	2
State government spending	2
Energy/The grid	2
Voting rights	2
Moral decline	2
Water supply	1
Environment/climate change	1
Housing	1
Opioid/drug abuse	1
Property rights	1
Race relations	1
State budget cuts	1
Transportation/roads/traffic	1
Utility rates	1
Social welfare programs	1
The media	1
Abortion	1
Police misconduct	0
Oil prices	0
Gas prices	0
Electoral fraud	0
Pension funding	0

[RANDOMLY SELECT Q39A OR Q39B]

Q39A. As you may know, Texas voters will be asked to vote on the following Constitutional amendment in the upcoming November Elections. Would you vote for this amendment, against this amendment, or don't you have an opinion?

The constitutional amendment to authorize the legislature to provide for an exemption from ad valorem taxation of the amount of the market value of real property located in a county that borders the United Mexican States that arises from the installation or construction on the property of border security infrastructure and related improvements.

Q39A	Percent
For the amendment	29
Against the amendment	24
Don't know/No opinion	47

Q39B. As you may know, Texas voters will be asked to vote on the following Constitutional amendment in the upcoming November Elections. Would you vote for this amendment, against this amendment, or don't you have an opinion?

This amendment would allow property owners in Texas border counties to get a property tax exemption for land value increases resulting from border security projects.

Q39B	Percent
For the amendment	49
Against the amendment	19
Don't know/No opinion	32

[RANDOMLY SELECT Q40A OR Q40B]

Q40A. As you may know, Texas voters will be asked to vote on the following Constitutional amendment in the upcoming November Elections. Would you vote for this amendment, against this amendment, or don't you have an opinion?

The constitutional amendment prohibiting the legislature from enacting a law imposing an occupation tax on certain entities that enter into transactions conveying securities or imposing a tax on certain securities transactions.

Q40A	Percent
For the amendment	27
Against the amendment	19
Don't know/No opinion	54

Q40B. As you may know, Texas voters will be asked to vote on the following Constitutional amendment in the upcoming November Elections. Would you vote for this amendment, against this amendment, or don't you have an opinion?

This amendment would prohibit the legislature from passing a law that taxes certain financial businesses or securities transactions.

Q40B	Percent
For the amendment	27
Against the amendment	32
Don't know/No opinion	41

Political Knowledge

[Randomize INFO1-INFO3]

INFO1. Who is the current Texas Agriculture Commissioner? **[RANDOMIZE 1-4]**

INFO1	Percent

Chase Oliver	0
Cornel West	0
Did not vote for President	13
Donald Trump	49
Jill Stein	1
Kamala Harris	36
Other	0
Robert F. Kennedy, Jr.	0

Sampling and Weighting Methodology for the October 2025 Texas Statewide Study

For the survey, YouGov interviewed 1627 Texas registered voters between October 10th, 2025 – October 20th, 2025 who were then matched down to a sample of 1,200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education.¹ The frame was constructed by using different subsets of a politically representative "modelled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and the 2020 presidential vote. In addition 2024 presidential vote was weighted to the CNN exit polls.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined, and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. The weights were then post-stratified on 2020 and 2024 Presidential vote choice, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

The margin of error for the sample is +/- 2.83%, and +/- 3.32% accounting for the weighted data for registered voters.

Survey Panel Data

The YouGov panel, a proprietary opt-in survey panel, is comprised of 1.5 million U.S. residents who have agreed to participate in YouGov Web surveys. At any given time, YouGov maintains a minimum of five recruitment campaigns based on salient current events.

Panel members are recruited by a number of methods and on a variety of topics to help ensure diversity in the panel population. Recruiting methods include Web advertising campaigns (public surveys), permission-based email campaigns, partner sponsored solicitations, telephone-to-Web recruitment (RDD based sampling), and mail-to-Web recruitment (Voter Registration Based Sampling).

The primary method of recruitment for the YouGov Panel is Web advertising campaigns that appear based on keyword searches. In practice, a search in Google may prompt an active YouGov advertisement soliciting opinion on the search topic. At the conclusion of the short survey respondents are invited to join the YouGov panel in order to receive and participate in additional surveys. After a double opt-in procedure, where respondents must confirm their consent by responding to an email, the database checks to ensure the newly recruited panellist is in fact new and that the address information provided is valid.

The YouGov panel currently has over 20,000 active panellists who are residents of Texas. These panellists cover a wide range of demographic characteristics.

Sampling and Sample Matching

Sample matching is a methodology for selection of "representative" samples from non-randomly

selected pools of respondents. It is ideally suited for Web access panels, but could also be used for other types of surveys, such as phone surveys. Sample matching starts with an enumeration of the target population. For general population studies, the target population is all adults, and can be enumerated through the use of the decennial Census or a high-quality survey, such as the American Community Survey. In other contexts, this is known as the sampling frame, though, unlike conventional sampling, the sample is not drawn from the frame. Traditional sampling, then, selects individuals from the sampling frame at random for participation in the study. This may not be feasible or economical as the contact information, especially email addresses, is not available for all individuals in the frame and refusals to participate increase the costs of sampling in this way.

Sample selection using the matching methodology is a two-stage process. First, a random sample is drawn from the target population. We call this sample the target sample. Details on how the target sample is drawn are provided below, but the essential idea is that this sample is a true probability sample and thus representative of the frame from which it was drawn.

Second, for each member of the target sample, we select one or more matching members from our pool of opt-in respondents. This is called the matched sample. Matching is accomplished using a large set of variables that are available in consumer and voter databases for both the target population and the opt-in panel.

The purpose of matching is to find an available respondent who is as similar as possible to the selected member of the target sample. The result is a sample of respondents who have the same measured characteristics as the target sample. Under certain conditions, described below, the matched sample will have similar properties to a true random sample. That is, the matched sample mimics the characteristics of the target sample.

When choosing the matched sample, it is necessary to find the closest matching respondent in the panel of opt-ins to each member of the target sample. YouGov employs the proximity matching method to find the closest matching respondent. For each variable used for matching, we define a distance function, $d(x,y)$, which describes how “close” the values x and y are on a particular attribute. The overall distance between a member of the target sample and a member of the panel is a weighted sum of the individual distance functions on each attribute. The weights can be adjusted for each study based upon which variables are thought to be important for that study, though, for the most part, we have not found the matching procedure to be sensitive to small adjustments of the weights. A large weight, on the other hand, forces the algorithm toward an exact match on that dimension.
